

Requirements and Functionalities: <https://iica.app>

1. Ignore everything that you see in the HOME PAGE of the existing website. Top section of the website must look like how it looks here @ <https://backstage.even.biz/>

I will give you the video that runs in the background.
Copy-paste all other text material.

In the RED button, write **Become a Member**

2. When you click “Become a Member”, a new page must open, which has the content, as written below. Please design this page nicely.

Exclusive membership with International Indian Culture & Arts brings the power of technology to elevate your brand value, by enriching your legacy of work with branding elements that remain relevant even beyond your lifetime.

Practical benefits of the exclusive membership are highlighted below:

- ★ SEO-powered life-journey published on the platform

When authentic life journeys of artists are published on a secure web platform that is powered with latest technologies, which enable visibility and enhances branding mileage of an artistic brand, it is possible to get authentic data-based proof of an artist's demand, in India & abroad. Snapshot of website performance report is shared, as a reference:

★ HD-quality promotion of your craft, creations, events, innovations

In crowded platforms like YouTube, and algorithm-driven platforms like Instagram, where consistent content drives engagement among random viewers, our strategy of milestone-focused promotion of artists brings value-added meaning to a niche community of fans and communities that respect the artists' works. Here are a few samples of reels and Newsletters that brought a community together & elevated an artist's brand value:

[Sandipan Parial](#) | [Neecia Majolly](#) | [Abhishek Chouhan](#) | [Shatavisha Mukherjee](#)

EMBED the 4 Instagram videos & the carousel post (the Neecia Majolly post), here, from the URLs I've already inserted into the Names of the 4 artists above.

- ★ Collaboration with like-minded and high-calibre artists

*The most powerful impact of collaborative projects is **creative placemaking** - the transformation of rigid, institutional, or marginalized public spaces into vibrant, inclusive hubs of collective identity and social change. We leverage the power of technology to facilitate creative collaborations that transform public spaces from empty concrete into democratic canvases for healing, representation, and shared heritage, nurtured by like-minded artists.*

We witnessed the potential of a musical when we brought together three eminent artists, namely, [Debasmita Bhattacharya](#), [Sandeep Vasishta](#), and [Anirban Bhattacharyya](#) - from around the world, on a collaborative Talk Show facilitated by technology.
